

ARJUN M B

MERN / PERN Stack Developer

Bangalore, Karnataka | 7356561176 | arjunmb1176@gmail.com | linkedin.com/in/arjun-mb | github.com/Arjunmb01 | arjundev.vercel.app

SUMMARY

MERN/PERN Stack Developer with hands-on professional and freelance experience building and deploying full-stack web applications across healthcare, e-commerce, EdTech, and FinTech domains. Skilled in React, Node.js, TypeScript, PostgreSQL/MongoDB, and cloud deployment on AWS (EC2, S3, CloudFront, Amplify) with Docker.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript

Frontend: React.js, Next.js, Redux Toolkit, Zustand, Tailwind CSS, HTML5, CSS3, Framer Motion, GSAP

Backend: Node.js, Express.js, REST APIs, JWT Authentication, Socket.IO

Databases: MongoDB, Mongoose, PostgreSQL, Prisma ORM, Redis

AI Integration: OpenAI API, LLM-Powered Q&A Assistants, Prompt Engineering

Cloud & DevOps: AWS (EC2, S3, CloudFront, Amplify), Docker, Docker Compose, Nginx, CI/CD, Vercel, Render

Tools & Integrations: Git/GitHub, Cloudinary, Razorpay, Stripe, PayPal, Postman, Google OAuth

EXPERIENCE

Web Developer — White Dart

Jun 2026 – Present

Full Stack Web Development (React, Node.js, AWS)

Bangalore, India

- Built and deployed the White Dart marketing website using React 18, Vite, and Tailwind CSS, including scheduling modals, animated demo consoles, and scroll-based reveal animations; deployed on AWS Amplify.
- Delivered new features for Accenlearn, an EdTech client platform built with React 19 and Tailwind CSS v4, based on employer specifications, including a dynamic workshop catalog, blog system, and automated SEO sitemap generator.
- Architected and deployed CashFlow, a containerized fintech MERN application, on AWS EC2 using Docker and Docker Compose; configured Nginx as a reverse proxy for the Node.js backend.
- Hosted the React frontend on Amazon S3 with CloudFront CDN, configuring path-based routing and custom error responses to support SPA client-side routing and API proxying.
- Managed PostgreSQL and Redis services within Docker containers; configured production environment variables, networking, and GitHub-based deployment workflows.
- Optimized frontend delivery through CloudFront cache invalidation and CDN caching strategies; guided a small team on CashFlow's admin-panel development.

PROJECTS

MedixFlow — Multi-Tenant Healthcare SaaS Platform

PERN Stack: PostgreSQL, Express 5, React 19, Node.js, TypeScript, Prisma, MongoDB, Redis, Socket.IO, WebRTC, BullMQ

- Designed and shipped a multi-tenant healthcare SaaS with three isolated portals (Patient, Doctor, Admin), enforcing RBAC and query-level tenant scoping at the service layer to prevent data from crossing tenant boundaries.
- Architected a dual-database system: PostgreSQL + Prisma for relational data (appointments, users, billing) and MongoDB + Mongoose for append-heavy records (audit logs, consultation notes), matching each store to its data shape.
- Built an appointment scheduling engine with availability-window conflict detection at the query level, making double-booking structurally impossible regardless of concurrent requests.

- Developed WebRTC peer-to-peer video consultations with a 4-state lifecycle (idle, waiting, active, ended), Socket.IO signaling, and automatic reconnection on network drops.
- Integrated Stripe, Razorpay, and PayPal with webhook signature verification, idempotency-key handling, and retry logic for consistent failure-mode recovery; used BullMQ + Redis for async reminders, notifications, and report generation with exponential-backoff retries.
- Improved query latency by ~40% through Redis caching on high-read endpoints, composite PostgreSQL indexes, and rewritten MongoDB aggregation pipelines; built 40+ typed REST endpoints with centralized error middleware, and an LLM-powered Q&A assistant in the Patient portal.

InfinityTech — E-Commerce Platform

Node.js, Express, MongoDB, EJS, Tailwind CSS, Passport.js

- Developed a full-featured e-commerce platform with a glass-effect admin dashboard, real-time analytics, and product, category, coupon, and order management.
- Integrated Cloudinary for cloud-based image storage, Razorpay for payments, and Passport.js Google OAuth with session-based authentication (connect-mongo).
- Configured serverless deployment on Vercel with MongoDB Atlas, replacing local file uploads for full cloud compatibility.

Chatify — Real-Time Chat Application

MERN Stack, Socket.IO, Zustand, Tailwind CSS, DaisyUI

- Built a real-time messaging app with custom JWT authentication, online/offline presence indicators, and typing notifications using Socket.IO.
- Implemented a REST API with Node.js, Express, and MongoDB; used Zustand for state management and Arcjet for API rate-limiting.
- Added Cloudinary image uploads, Resend-powered welcome emails, and deployed the application on a free-tier-friendly host (Sevalla).

SSK Handlooms — Luxury E-Commerce Frontend (Freelance)

React 19, TypeScript, Tailwind CSS v4, GSAP, Framer Motion

- Built a premium, high-fidelity responsive e-commerce frontend for a heritage handloom brand, integrating GSAP ScrollTrigger for scroll-driven, pinned storytelling sections.
- Implemented advanced UI systems including circular image-reveal animations and staggered checkerboard grids with zoom/fade transitions.
- Delivered pixel-perfect, mobile-first responsive layouts scaling cleanly from 375px to 1440px+ viewports with zero horizontal overflow.

EDUCATION

SNM Institute of Management and Technology

B.Tech in Instrumentation and Control Engineering

Graduated 2022
